

Rilao Expedition 12-348 
Journal entry December 7, 1962

Item # 7735.22-f

Name: Architectural Rendering 33

Found: Office building ruins, Central Green Bite

Purpose: Architectural rendering of housing complex on the coast of Green Bite. Construction materials and methodology presumed to be of bioengineered coral, design and controlled by an unknown external system.

Rilao Expedition 22-348
Journal entry July 22, 1985

Item # 7765.98-a

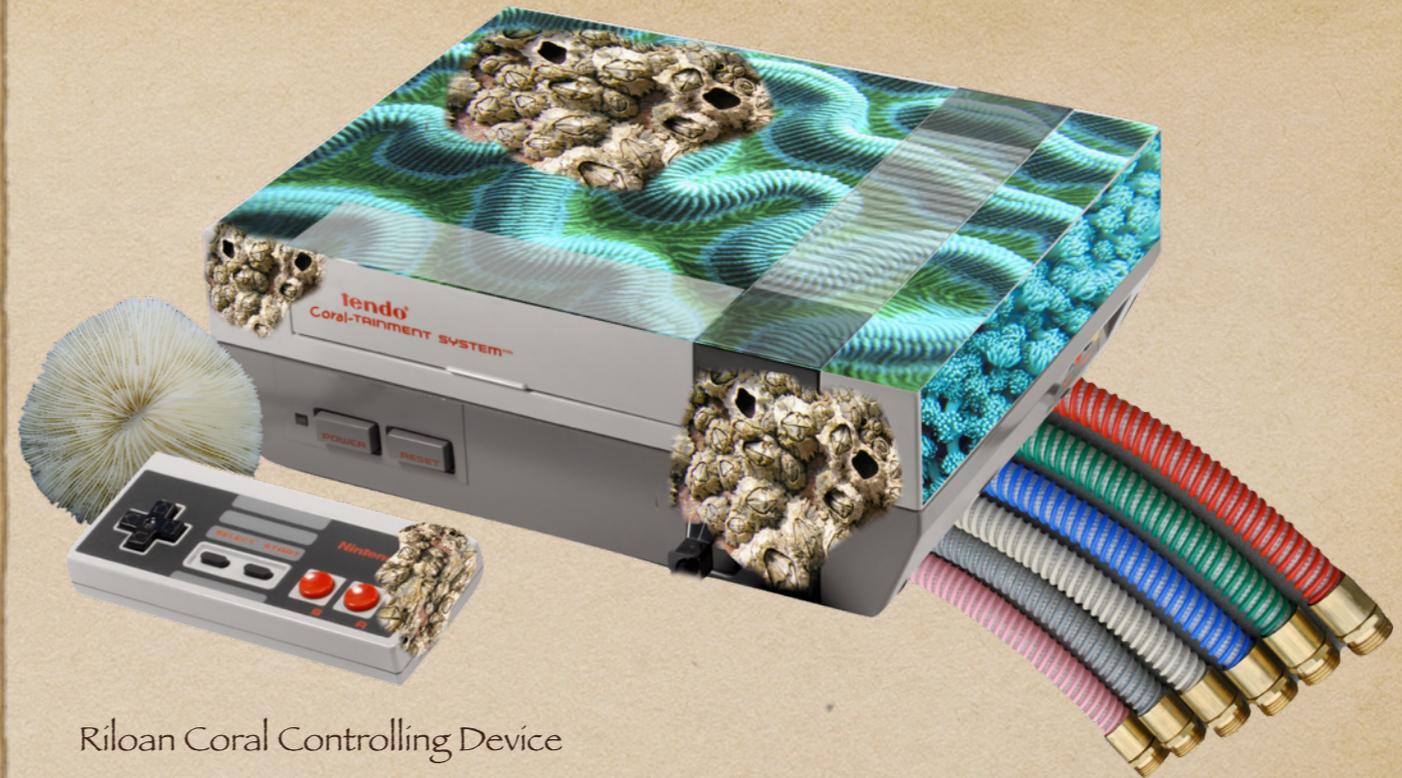

Name: "Tendo"

Found: Beach, SW Green Bite

Purpose: Presumed to be a control system for genetically engineered coral. Coral is controlled through bio-electroconductive slime. Can be caused to grow in multitude of shapes and functions.

Device appears to have been hacked together using a modern computer game console and augmented with bio-circuitry.

Additional evidence found in Green Bite suggest bioengineered coral was used in the construction of housing, cathedrals, food production and [ref. item 7735.22-f]

Riloan Coral Controlling Device

Riloan Coral Controlling "Coral-ware" Storage Device

Rilao Expedition 22-348
Journal entry July 22, 1985

Item # 7789.11-c

Name: Engineered Coral Node

Found: Beach, SW Green Bite

Purpose: Node of bioengineered coral. Coral is controlled through bio-electroconductive slime. Can be caused to grow in multitude of shapes and functions.

Additional evidence found in Green Bite suggest bioengineered coral was used in the construction of housing, cathedrals, food production and [ref. item 887.556.a.1]
